The SAGE Encyclopedia of Communication Research Methods Mike Allen 2017-04-11 Communication research is evolving and changing in a world of online journals, open-access, and new ways of obtaining data and conducting experiments via the Internet. Although there are generic encyclopedias describing basic social science research methodologies in general, until now there has been no comprehensive A-to-Z reference work exploring methods specific to communication and media studies. Our entries, authored by key figures in the field, focus on special considerations when applied specifically to communication research, accompanied by engaging examples from the literature of communication, journalism, and media studies. Entries cover every step of the research process, from the creative development of research topics and questions to literature reviews, selection of best methods (whether quantitative, qualitative, or mixed) for analyzing research results and publishing research findings, whether in traditional media or via new media outlets. In addition to expected entries covering the basics of theories and methods traditionally used in communication research, other entries discuss important trends influencing the future of that research, including contemporary practical issues students will face in communication professions, the influences of globalization on research, use of new recording technologies in fieldwork, and the challenges and opportunities related to studying online multi-media environments. Email, texting, cellphone video, and blogging are shown not only as topics of research but also as means of collecting and analyzing data. Still other entries delve into considerations of accountability, copyright, confidentiality, data ownership and security, privacy, and other aspects of conducting an ethical research program. Features: 652 signed entries are contained in an authoritative work spanning four volumes available in choice of electronic or print formats. Although organized A-to-Z, front matter includes a Reader's Guide grouping entries thematically to help students interested in a specific aspect of communication research to more easily locate directly related entries. Back matter includes a Chronology of the development of the field of communication research; a Resource Guide to classic books, journals, and associations; a Glossary introducing the terminology of the field; and a detailed Index. Entries conclude with References/Further Readings and Cross-References to related entries to guide students further in their research journeys. The Index, Reader's Guide themes, and Cross-References combine to provide robust search-and-browse in the e-version.

Evaluation in Education Richard M. Wolf 1990 Educational evaluation has changed considerably since Wolf's first edition. The value of his ideas has not. This third edition extends and refines the first. Wolf identifies basic questions addressed in studies and information needed to answer those questions. Throughout, he advocates an eclectic approach—combining qualitative and quantitative techniques. Wolf adds new material including a chapter on the contemporary scene. Text or handbook, this comprehensive volume covers the history of evaluation, planning and conducting studies, analysis of results, report preparation, and decision making.

Professional Teacher Education Module Series 1982

Prioritization, Delegation, and Assignment Linda A. LaCharity 2005-12 This must-have workbook helps students learn the prioritization and delegation skills needed to survive nursing school, pass the NCLEX-RN® examination, and make the transition to practice in today's healthcare environment. Consisting of three parts plus an answer key, this resource provides numerous opportunities for students to review cases and answer questions similar to those they will see on the NCLEX-RN examination - including questions in alternate-item formats. Part 1, written by delegation expert Ruth Hansten, is an introduction that provides a practical review of clinical delegation skills and serves as a framework for the exercises that follow. Part 2 consists of cases of patients who have relatively straightforward health problems followed by NCLEX examination-style questions focusing on prioritization, delegation, and assignment. Part 3 consists of complex, unfolding cases involving patients who have multiple health conditions, as well as complex patient assignments. An introduction by prioritization and delegation expert Ruth Hansten explains the importance of developing sound clinical skills and judgment in the areas of prioritization, delegation, and assignment. NCLEX-style questions help students develop fundamental skills in prioritization, delegation, and assignment and become familiar with the NCLEX examination format. Questions in Parts 2 and 3 are organized by body system and by complexity, respectively, to allow for easy use with any medical-surgical nursing text. Both sections of exercises give students essential hands-on practice in prioritizing (deciding what to do first), delegating (giving specific tasks to assistive personnel and supervising satisfactory

completion of those tasks), and assignment (giving responsibility for the overall care of particular patients to appropriate personnel). The questions in Part 3 are more complex than those in Part 2, allowing students to master core concepts using unambiguous cases before applying this knowledge to patients with more complicated, multidimensional case presentations. Flexible organization allows the workbook to be used with any Elsevier medical-surgical nursing text. The answer key provides rationales for correct as well as incorrect answers, reinforcing the concepts presented in each unit. Questions follow NCLEX style, and about 10% represent the new alternate-item question format. The workbook is three-hole punched and perforated for convenience.

Educating Professionals Lynn Curry 1993-04-20 This in-depth examination of how to educate professionals for the future identifies the social and political forces that will affect the roles of professionals and change the definitions of professional skill. It shows how educating professionals for the twenty-first century will ultimately require stronger bonds between educational systems and our systems of practice--including more accurate measures of competence and a more integrated system of continuing professional education.

CNA Certified Nursing Assistant Exam Cram Linda Whitenton 2017 Includes access to companion website with practice tests, other study materials, and additional bonus content.

The Law of Teacher Evaluation Lawrence F. Rossow 1992 Litigation in the area of teacher evaluation has developed around issues concerning the processes and criteria used by school districts in conducting evaluations. Following an introduction explaining basic concepts, chapter 2 discusses the appropriate content of teacher evaluation, examining formal adoption of evaluation policies, compliance with state statutes and regulations, and content and constitutional requirements. Chapter 3 focuses on the use of commonly recognized statutory grounds for terminating teachers and the part these grounds play in evaluation. The procedural aspects of evaluation, such as the use of objective criteria and remediation, are described in chapter 4. The fifth chapter discusses the use of competency testing, issues of test validity, potential constitutional challenges, discrimination, and miscellaneous legal considerations. Issues in teacher evaluation and defamation claims are examined in the final section, presenting lines of defense available to administrators to protect against such claims. A conclusion points to the pervasive attitude of judicial deference to the decisions of educational policymakers. (317 footnotes) (LMI)

Home Care Nursing Delegation Skills Ruth I. Hansten 1999 An essential reference for nursing students in developing and implementing the competencies necessary in caring for critically ill patients! **Synergy for Clinical Excellence: The AACN Synergy Model for Patient Care** enhances the understanding of The Synergy Model in practice. Based on a decade of work by the American Association of Critical-Care Nurses, the text encompasses the history and development of the nurse and patient characteristic inherent in The Synergy Model, and then thoroughly addresses each characteristic individually and applies the model in practice. Includes sample test questions relevant to the model that will assist nursing students in preparing for certification through AACN, and provide further examples of the integration of the Synergy Model in practice.

Media, Education, and America's Counter-culture Revolution Robert L. Hilliard 2001 Media, Education and America's Counter-Culture Revolution is an adaptation and amalgamation of some of the author's speeches, papers, and essays during his service in several federal government communication and education posts during the 1960s and 1970s. Dealing with the use and misuse of media and their impact--or lack of it--on our country's political, cultural, and educational development, this book shows how far we fell short of what we might have done with the media, and suggests what we might still do.
