Hand Bone Age Gilsanz 2011-10-21 In the past, determination of bone maturity relied on visual evaluation of skeletal development in the hand and wrist, most commonly using the Greulich and Pyle atlas. The Gilsanz and Ratib digital atlas takes advantage of digital imaging and provides a more effective and objective approach to assessment of skeletal maturity. The atlas integrates the features of ossification in the bones of the hand and wrist and provides idealized, sex- and age-specific images of skeletal development. New to this revised second edition is a description of the Bone Age for iPad®, iPhone®, and iPod touch®, which can be purchased and used separately from this book. The App can be easily employed to calculate the deviation of the patient's age from the normal range and to predict a possible growth delay. This easy-to-use atlas and the related App will be invaluable for radiologists, endocrinologists, and pediatricians and also relevant to forensic medicine. iPhone 4 Made Simple Martin Trautschold 2011-01-26 Congratulations—you've purchased an iPhone 4, arguably the coolest smartphone on the market. Passive and Active Measurement Arvind Krishnamurthy 2010-04-01 The 2010 edition of the Passive and Active Measurement Conference was the 11th of a series of successful events. Since 2000, the Passive and Active Measurement (PAM) conference has provided a forum for presenting and discussing innovative and early work in the area of Internet measurements. PAM has a tradition of being a conference with lively discussion and active participation from all attendees. This event focuses on research and practical applications of network measurement and analysis techniques. The 2010 PAM was held at ETH Zurich, Switzerland. PAM 2010 attracted 79 submissions. Each paper was carefully reviewed by at least three members of the Technical Program Committee. The reviewing process led to the acceptance of 23 papers. The papers were arranged in nine sessions covering the following areas: routing, transport protocols, mobile devices, topology, measurement infrastructure, characterization, analysis techniques, traffic analysis, and the Web. We are very grateful to Endace Ltd. (New Zealand), Cisco Systems Inc. (USA), armassuisse (Switzerland) and the COST Action TMA which allowed us to keep registration costs slow and to offer several travel grants to PhD students. We are also grateful to ETH Zurich for sponsoring PAM as a host.
