Concise Repertory of Homeopathic Medicines S. R. Phatak 2004-02 This repertory is intended to serve as a handy and useful reference book. It is an attempt to lessen the difficulties of the prescriber. Remedies for a particular rubric are reduced to minimum possible by a careful selection. No drug is given unless there is strong justification provided for it, by authorities like Dr. Boger, Dr. Kent, Dr. Clarke's dictionary, etc. In this repertory, the heading including Mentals, Generals, Modalities, Organs, and their Sub-parts are all arranged according to their Alphabetical order. All the physiological and pathological conditions are also included. Cross references are given where-ever necessary.

Allen's Keynotes Rearranged & Classified Henry C. Allen 2006-01-01 "Allen's Keynotes" is one of the most popular and widely read materia medica. The reason for its popularity being its preciseness and comprehensiveness. Keeping in view its usefulness for the students and practitioners of homeopathy.

Magnetic Small-Angle Neutron Scattering Andreas Michels 2021-04-01 This monograph provides the first extensive treatment of magnetic small-angle neutron scattering (SANS). The theoretical background required to compute magnetic SANS cross sections and correlation functions related to long-wavelength magnetization structures is laid out. The concepts are scrutinized based on the discussion of experimental neutron data. Regarding prior background knowledge, some familiarity with the basic magnetic interactions and phenomena as well as scattering theory is desired. Besides exposing the different origins of magnetic SANS, and furnishing the basics of the magnetic SANS technique in early chapters, a large part of the book is devoted to a comprehensive treatment of the continuum theory of micromagnetics, as it is relevant for the study of the elastic magnetic SANS cross section. Analytical expressions for the magnetization Fourier components allow to highlight the essential features of magnetic SANS and to analyze experimental data both in reciprocal, as well as in real space. Later chapters provide an overview on the magnetic SANS of nanoparticles and so-called complex systems (e.g., ferrofluids, magnetic steels, spin glasses and amorphous magnets). It is this subfield where major progress is expected to be made in the coming years, mainly via the increased usage of numerical micromagnetic simulations (Chapter 7), which is a very promising approach for the understanding of the magnetic SANS from systems exhibiting nanoscale spin inhomogeneity.

Group Study In Homeopathic Materia Medica Patil J. D. 2007 Group study in Homeopathic Materia Medica is a unique compilation that presents schematic overview of groupwisestudy of drugs included in the homeopathic materia medica. It concisely presents the most important aspects on the subject of Group Study at a glance. This book is the only book that includes all the drugs source kingdoms. Due emphasis has been given to the most important common physical and mental generalizations. The reader will find much useful information for the comparative and differential study of the drugs. Flow charts are added for ready reference. The undergraduate and postgraduate students as well as academicians and practitioners will find this book of a great use in their day to day work.

Occupational Therapy with Children Sylvia Rodger 2006-06-05 Occupational Therapy with Children draws on contemporary research to examine children's roles, their occupations and the skills which underpin their ability to participate in society. The book will develop the occupational therapist's understanding of how to optimise the participation of children in the various environments in which they are required or choose to engage. Occupational Therapy with Children maintains a developmental perspective and incorporates child-centred interventions to improve performance deficits. Section one examines children's roles and occupations in contemporary society at a broad level. Coverage includes the child's participation in the family, at school and in the community. This section considers environmental influences on childhood activities, and highlights children's changing occupational time use and the impact this has on health and wellbeing. Section two focuses on childhood as a period of significant development and skill acquisition. This is profiled as a dynamic period for the therapist to encourage occupational mastery across the spectrum of childhood experience: in play; in self-care; as a student; and beyond the school grounds. Topical chapters evaluate participation in physical activity and consider the potential for 'healthy' leisure, along with the risk characteristics associated with certain approaches to leisure. Occupational Therapy with Children is aimed at students and practitioners of occupational therapy. Other childhood professionals, particularly early childhood educators, will also appreciate the articulate approach this book takes towards the development of the child. Highly illustrated with contemporary photographs, drawings and succinct tables Includes case studies; providing worked examples of therapeutic applications Draws on the World Health Organisation International Classification of Functioning, Disability and Health (ICF) to frame the concept of children's occupations and societal participation Responsive to developments in occupational science Expert contributors provide international perspectives From the Foreword by Professor Charles Christiansen, The University of Texas Medical Branch, Galveston [Occupational therapists] will find that this book provides a framework that makes planning effective therapy with children practical, relevant, and effective. . . . [Rodger & Ziviani's] contribution to the literature has helped unleash the genie of occupation in the service of improved therapy with children.

Desert Oracle Ken Layne 2020-12-08 The cult-y pocket-size field guide to the strange and intriguing secrets of the Mojave—its myths and legends, outcasts and oddballs, flora, fauna, and UFOs—becomes the definitive, oracular book of the desert. For the past five years, Desert Oracle has existed as a quasi-mythical, quarterly periodical available to the very determined only by subscription or at the odd desert-town gas station or the occasional hipster boutique, its canary-yellow-covered, forty-four-page issues handed from one curious desert zealot to the next, word spreading faster than the printers could keep up with. It became a radio show, a podcast, a live performance. Now, for the first time—and including both classic and new, never-before-seen revelations—Desert Oracle has been bound between two hard covers and is available to you. Straight out of Joshua Tree, California, Desert Oracle is "The Voice of the Desert": a field guide to the strange tales, singing sand dunes, sagebrush trails, artists and aliens, authors and oddballs, ghost towns and modern legends, musicians and mystics, scorpions and saguaros, out there in the sand. Desert Oracle is your companion at a roadside diner, around a campfire, in your tent or cabin (or high-rise apartment or suburban living room) as the wind and the coyotes howl outside at night. From journal entries of long-deceased adventurers to stray railroad ad copy, and musings on everything from desert flora, rumored cryptid sightings, and other paranormal phenomena, Ken Layne's Desert Oracle collects the weird and the wonderful of the American Southwest into a single, essential volume.
