Development and Social Change Philip McMichael 2016-01-25 In this new Sixth Edition of Development and Social Change: A Global Perspective, author Philip McMichael describes a world undergoing profound social, political, and economic transformations, from the post-World War II era through the present. He tells a story of development in four parts—colonialism, developmentalism, globalization, and sustainability—that shows how the global development "project" has taken different forms from one historical period to the next. Throughout the text, the underlying conceptual framework is that development is a political construct, created by dominant actors (states, multilateral institutions, corporations and economic coalitions) and based on unequal power arrangements. While rooted in ideas about progress and prosperity, development also produces crises that threaten the health and well-being of millions of people, and sparks organized resistance to its goals and policies. Frequent case studies make the intricacies of globalization concrete, meaningful, and clear. Development and Social Change: A Global Perspective challenges us to see ourselves as global citizens even as we are global consumers.

The Economy Core Team 2017-09-21 The only introductory economics text to equip students to address today's pressing problems by mastering the conceptual and quantitative tools of contemporary economics. OUP has partnered with the international collaborative project of CORE researchers and teachers to bring students a book and learning system that complements and enhances CORE's open-access online e-book. The Economy is a new approach that integrates recent developments in economics including contract theory, strategic interaction, behavioural economics and financial instability. It challenges students to address inequality, climate change, economic instability, wealth creation and innovation and other problems. It has been adopted as the standard principles course at University College London, Sciences Po Paris and the Toulouse School of Economics. A new economics for the principles course The Economy begins with social interactions using elementary game theory and institutions modelled as rules of the game. This provides the basis for a modern treatment of markets including price-making as well as price-taking, the exercise of power, and the importance of social norms and adjustment to disequilibria. Introducing labour and credit markets with incomplete contracts allows a consistent treatment of aggregate employment and fluctuations without the need for ad hoc sticky price and wage assumptions. Banks create money by extending credit and a central bank seeks to implement a target inflation rate. Growth and instability are illustrated from the Great Depression, through the post-war golden age of capitalism through to the financial crisis and ensuing uncertainties. Students acquire an understanding of the past and current evolution of the economy in its social and environmental context, equipping them to marshal evidence and articulate positions about contemporary policy issues.

Alibaba's World Porter Erisman 2015-05-12 In September 2014, a Chinese company that most Americans had never heard of held the largest IPO in history – bigger than Google, Facebook and Twitter combined. Alibaba, now the world's largest e-commerce company, mostly escaped Western notice for over ten years, while building a customer base more than twice the size of Amazon's, and handling the bulk of e-commerce transactions in China. How did it happen? And what was it like to be along for such a revolutionary ride? In Alibaba's World, author Porter Erisman, one of Alibaba's first Western employees and its head of international marketing from 2000 to 2008, shows how Jack Ma, a Chinese schoolteacher who twice failed his college entrance exams, rose from obscurity to found Alibaba and lead it from struggling startup to the world's most dominant e-commerce player. He shares stories of weathering the dotcom crash, facing down eBay and Google, negotiating with the unpredictable Chinese government, and enduring the misguided advice of foreign experts, all to build the behemoth that's poised to sweep the ecommerce world today. And he analyzes Alibaba's role as a harbinger of the new global business landscape—with its focus on the East rather than the West, emerging markets over developed ones, and the nimble entrepreneur over the industry titan. As we face this near future, the story of Alibaba—and its inevitable descendants—is both essential and instructive.

Saving Us Katharine Hayhoe 2021-09-21 United Nations Champion of the Earth, climate scientist, and evangelical Christian Katharine Hayhoe changes the debate on how we can save our future in this nationally bestselling "optimistic view on why collective action is still possible—and how it can be realized" (The New York Times). Called "one of the nation's most effective communicators on climate change" by The New York Times, Katharine Hayhoe knows how to navigate all sides of the conversation on our changing planet. A Canadian climate scientist living in Texas, she negotiates distrust of data, indifference to imminent threats, and resistance to proposed solutions with ease. Over the past fifteen years Hayhoe has found that the most important thing we can do to address climate change is talk about it—and she wants to teach you how. In Saving Us, Hayhoe argues that when it comes to changing hearts and minds, facts are only one part of the equation. We need to find shared values in order to connect our unique identities to collective action. This is not another doomsday narrative about a planet on fire. It is a multilayered look at science, faith, and human psychology, from an icon in her field—recently named chief scientist at The Nature Conservancy. Drawing on interdisciplinary research and personal stories, Hayhoe shows that small conversations can have astonishing results. Saving Us leaves us with the tools to open a dialogue with your loved ones about how we all can play a role in pushing forward for change.
