Improving the Quality of Health Care for Mental and Substance-Use ConditionsInstitute of Medicine 2006-03-29 Each year, more than 33 million Americans receive health care for mental or substance-use conditions, or both. Together, mental and substance-use illnesses are the leading cause of death and disability for women, the highest for men ages 15-44, and the second highest for all men. Effective treatments exist, but services are frequently fragmented and, as with general health care, there are barriers that prevent many from receiving these treatments as designed or at all. The consequences of this are seriousâ€”for these individuals and their families; their employers and the workforce; for the nationâ€™s economy; as well as the education, welfare, and justice systems. Improving the Quality of Health Care for Mental and Substance-Use Conditions examines the distinctive characteristics of health care for mental and substance-use conditions, including payment, benefit coverage, and regulatory issues, as well as health care organization and delivery issues. This new volume in the Quality Chasm series puts forth an agenda for improving the quality of this care based on this analysis. Patients and their families, primary health care providers, specialty mental health and substance-use treatment providers, health care organizations, health plans, purchasers of group health care, and all involved in health care for mental and substanceâ€”use conditions will benefit from this guide to achieving better care.

From the Womb to the TombCarl Toersbijn 2014-12-27 An in-depth book about twenty-six-year-old Tony Lester's preventable suicide and how he struggled to be recognized as a special needs person from the time he was arrested to the time he died. Real case documentation that has been validated by internal reports and inspections. This book will make you think about the role the criminal justice system plays with those seriously mentally ill and experiencing coping and functional difficulties. No political slandering here; just the facts as they were reported by KPNX investigative reporter Wendy Halloran and myself and how the family sought help in exposing the wrongful death of their son, nephew, leaving behind a young girl left without her father ever coming home to her. This book comprehensively covers the police report, the rule 11 procedures, and the investigation into his death. Also included are excerpts from the ACLU findings and how they applied to Tony's personal crises and how his needs were downplayed due to cultural beliefs inmates are manipulators and always have a motive, thus they are liars and unworthy of trust or care for their problems. Based on the same dynamics found by the ACLU experts, this reveals the shoddy work of the state's medical and psychiatric care standards applied in ad hoc conditions because of lack of commitment, resources, staffing, and training. Tony experienced the perfect storm when he was incarcerated and died in less than four months of doing time. An exclusive peek at a crisis situation still simmering inside the department of corrections systems that has failed him and thousands of others. It shows how his treatment needs were ignored as well as his pleas unheeded resulting in his death and how they compare to today's findings still broken and still not fixed. This book is an in-depth detailed layout of the culture, the practices, the deliberate indifferences toward the mentally ill and how mentally ill persons are victimized and criminalized by political and criminal justice approaches and dynamics toward the seriously ill persons and how they must deal with the stigmas and discrimination of being a mentally ill person inside Arizona prisons. Dynamics include sociopolitical ramifications for being incarcerated, suicide watch culture, adequate care and treatment, security attitudes toward these special needs persons, and much more. Real case scenarios listed from the ACLU class action lawsuit that resembles or duplicates Tony's plight, frustration, and situations that ended his life. This book illustrates shoddy death investigations, marginalized attitudes about human values in prison and other cultural influences that dictate how prisons are run, prisoners are mistreated and even some darkness on solitary confinement in the detention units and max custody facilities. A real wakeup call for many who have family members in prison and others wanting to change prison conditions. Included are the family's frustrations with an agency which boasts the best defense of keeping secrets behind closed doors and the struggle KPNX and Wendy Halloran went through to get the secret video. All in all, it is an in-depth account of how a wrongful death leaves people devastated and asking the most frequent question: why? When you read this book you will see the root of causes. After you read this book, you will understand the agony and despair a mentally ill person endures when they are labeled, ignored, or ridiculed by the system that is supposedly protect them.

Walker 2015-12-15 This authoritative volume provides state-of-the-art practices for supporting the approximately 20% of today's K-12 students who have emotional and behavioral disorders (EBD) that hinder school success. Leading experts present evidence-based approaches to screening, progress monitoring, intervention, and instruction within a multi-tiered framework. Coverage encompasses everything from early intervention and prevention to applications for high-risk adolescents. Exemplary programs are described for broad populations of EBD students as well as those with particular disorders, including autism spectrum disorders and externalizing behavior problems. The book combines theory and research with practical information on how to select interventions and implement them with integrity.

Transition-Age Youth Mental Health Care Vivien Chan 2021-03-10 Over the course of the last two decades, improved practices in child and adolescent mental healthcare have led to a decreased environment of stigma, which also led to an increased identification and treatment of mental health disorders in children and youth. Considering that treatment and outcomes are improved with early intervention, this is good news. However, the success gained in the field of child and adolescent psychiatry leads to a new challenge: transitioning from adolescent care to adult care. It has been known for some time that children, adult, and geriatric patients all have unique needs where it comes to mental healthcare, yet limited work has been done where it comes to the shifting of the lifespan. Where it comes to the child-adult transition—defined as those in their late teens and early/mid-20s—there can be multiple barriers in seeking mental healthcare that stem from age-appropriate developmental approaches as well as include systems of care needs. Apart from increasing childhood intervention, the problem is exacerbated by the changing social dynamics: more youths are attending college rather than diving straight into the workforce, but for various reasons these youths can be more dependent on their parents more than previous generations. Technology has improved the daily lives of many, but it has also created a new layer of complications in the mental health world. The quality and amount of access to care between those with a certain level of privilege and those who do not have this privilege is sharp, creating more complicating factors for people in this age range. Such societal change has unfolded so rapidly that training programs have not had an opportunity to catch up, which has created a crisis for care. Efforts to modernize the approach to this unique age group are still young, and so no resource exists for any clinicians at any phase in their career. This book aims to serve as the first concise guide to fill this gap in the literature. The book will be edited by two leading figures in transition age youth, both of whom are at institutions that have been at the forefront of this clinical work and research. This proposed mid-sized guide is therefore intended to be a collaborative effort, written primarily by child and adolescent psychiatrists, and also with adult psychiatrists. The aim is to discuss the developmental presentation of many common mental health diagnoses and topics in chapters, with each chapter containing clinically-relevant "bullet points" and/or salient features that receiving providers, who are generally, adult-trained, should keep in mind when continuing mental health treatment from the child and adolescent system. Chapters will cover a wide range of challenges that are unique to transition-age youths, including their unique developmental needs, anxiety, mood, and personality disorders at the interface of this development, trauma and adjustment disorders, special populations, and a wide range of other topics. Each chapter will begin with a clinical pearl about each topic before delving into the specifics.
