Sustainable Living with Environmental Risks Nobuhiro Kaneko 2014-03-11 We are not free from environmental risks that accompany the development of human societies. Modern economic development has accelerated environmental pollution, caused loss of natural habitats, and modified landscapes. These environmental changes have impacted natural systems: water and heat circulation, nutrient cycling, and biodiversity. These changes in natural systems degrade ecosystem services and subsequently increase environmental risks for humans. Environmental risks, therefore, are not only human health risks by pollution, climatic anomalies and natural disasters, but also degradation of ecosystem services on which most people are relying for their lives. We cannot entirely eliminate the risks, because it is not possible to attain zero impact on the environment, but we need to find a mechanism that minimizes environmental risks for human sustainably. This is the idea of the interdisciplinary framework of "environmental risk management" theory, which advocates harmony between economic development and environmental conservation. Based on this theory, the Sustainable Living with Environmental Risk (SLER) programme, adopted by the Japanese Ministry of Education (MEXT) as one of its strategic programmes, has been training graduate students at the Yokohama National University, Japan, from 2009 to 2013 to become future environmental leaders who will take the initiative in reducing the level of environmental risks and in protecting natural resources in the developing nations of Asia and Africa. This book provides students and teachers of this new academic field with a comprehensive coverage of case studies of environmental risks and their practical management technologies not only in Japan but also in developing nations in Asia and Africa.

Beethoven David Benjamin Levy 2003-01-01 Beethoven's Ninth Symphony, a masterpiece that has influenced virtually every Western composer since its premiere, has become associated with the marking of momentous public occasions. In 1989, Chinese students played its finale through loudspeakers in Tiananmen Square, and Leonard Bernstein led a performance in Berlin to celebrate the razing of the Berlin Wall. This lively and up-to-date book focuses on Beethoven's Ninth, exploring the cultural and musical meanings that surround this powerful work of genius. David B. Levy sets the scene with a brief survey of nineteenth-century Germanic culture and society, then analyzes the Ninth symphony in detail with special emphasis on the famous choral finale. He discusses the initial performances in 1824 under Beethoven's direction and traces the symphony's critical reception and legacy. In the final chapter of the book, Levy examines interpretations of the work by prominent conductors, including Wagner, Mahler, and Weingartner. A fully annotated discography of selected recordings completes this comprehensive volume.

Zooplankton Diversity and Pelagic Food Webs Marina Manca 2021-05-04 Zooplankton are of key importance in the structure and functioning of aquatic food webs. They contribute to a large part of the functional and structural biodiversity of predator and prey plankton communities. Promptly responding to long-term and seasonal changes in the physical and chemical environment, they are sensitive indicators of patterns and mechanisms of impact drivers, both natural and human induced. In this volume, we aim to present evidence for both long-term and seasonal changes in zooplankton community structure and dynamics, investigating different approaches from population dynamics to advanced molecular techniques and reconstructing past communities from microfossil remains in lake sediments.

Little Elf: A Celebration of Harry Langdon Chuck Harter & Michael J. Hayde Harry Langdon, a comic who appeared in Vaudeville, silent movies, and sound film comedies, held a unique position in Hollywood history. After a long start in movies, he joined Keystone, the famous Mack Sennett studio. Langdon's screen character was quite different from the broad slapstick that was popular at the time. When paired with director Frank Capra in films such as *The Strong Man* (1926), *Tramp, Tramp, Tramp* (1926), and *Long Pants* (1927), he rivaled Charlie Chaplin, Buster Keaton, and Harold Lloyd. Chuck Harter and Michael J. Hayde's biography includes a comprehensive filmography. Lavishly illustrated. "You can hear the laughter flowing through the book. Langdon's comic timing was about taking enough time to figure out a situation. The reader should do the same, and not rush through these wonderful pages." - Brad Linaweaver, *Mondo Cult* "[The authors] have done a great service for comedy aficionados and historians, offering up a cornucopia of information on every one of Langdon's screen appearances, rare photos, vintage magazine articles, and more. If you have any interest in Harry Langdon, this book is invaluable." - Leonard Maltin in *Leonard Maltin's Movie Crazy*

Manual of Romance Phonetics and Phonology Christoph Gabriel 2021-11-22 This handbook is structured in two parts: it provides, on the one hand, a comprehensive (synchronic) overview of the phonetics and phonology (including prosody) of a breadth of Romance languages and focuses, on the other hand, on central topics of research in Romance segmental and suprasegmental phonology, including comparative and diachronic perspectives. Phonetics and phonology have always been a core discipline in Romance linguistics: the wide synchronic variety of languages and dialects derived from spoken Latin is extensively explored in numerous corpus and atlas projects, and for quite a few of these varieties there is also more or less ample documentation of at least some of their diachronic stages. This rich empirical database offers excellent testing grounds for different theoretical approaches and allows for substantial insights into phonological structuring as well as into (incipient, ongoing, or concluded) processes of phonological change. The volume can be read both as a state-of-the-art report of research in the field and as a manual of Romance languages with special emphasis on the key topics of phonetics and phonology.
