**Dongri to Dubai - Six Decades of the Mumbai Mafia** Hussain Zaidi 2012-08-10 Dongri to Dubai is the first ever attempt to chronicle the history of the Mumbai mafia. It is the story of notorious gangsters like Haji Mastan, Karim Lala, Varadarajan Mudaliar, Chhota Rajan, Abu Salem, but above all, it is the story of a young man who went astray despite having a father in the police force. Dawood Ibrahim was initiated into crime as a pawn in the hands of the Mumbai police and went on to wipe out the competition and eventually became the Mumbai police's own nemesis. The narrative encompasses several milestones in the history of crime in India, from the rise of the Pathans, formation of the Dawood gang, the first ever supari, mafia's nefarious role in Bollywood, Dawood's move to Karachi, and Pakistan's subsequent alleged role in sheltering one of the most wanted persons in the world. This story is primarily about how a boy from Dongri became a don in Dubai, and captures his bravado, cunningness, focus, ambition, and lust for power in a gripping narrative. The meticulously researched book provides an in-depth and comprehensive account of the mafia's games of supremacy and internecine warfare.

Seven Social Sins J.S. Rajput 2012-11-10 This book has been prepared with great expectations. The relevance of dynamism in Gandhian thought, percept and vision could guide the concerned citizens and policy makers in the search for solutions. Each of the seven sins identified gets organically linked to the remaining six. Hopefully, it would provide sparks for further study and analysis of how the ideology of progress that India deserves could evolve, taking the best from outside but retaining the flavour of the indigenous thought and wisdom. Indian democracy, with all its lacunae and inadequacies, has certainly made aware a large chunk of its citizens of their responsibilities and duties. The young are now alert to their own role that the country expects them to perform. The idealism of the youth, strengthened with inputs from Gandhian thought and approach, could be sustained on a strong base of value development strategies. An emerging knowledge society must derive strength from its existing cognitive capital and its analysis and contemporary relevance could always bring in substantial additions and advancements. Those, to whom this volume could reach, may be better prepared to contribute effectively to the cause of the nation building.

26/11 Mumbai Attacked Ashish Khetan 2009-02-01 Bringing together the careful research and analyses of renowned journalists and police officials, 26/11 Mumbai Attacked explicates the reality behind the brazen attack on India's sovereignty in November 2008 when ten heavily armed terrorists held an entire city at ransom by the sheer force of their zealotry. The scene-by-scene accounts, incisive analyses, and an exclusive interview with a LeT representative along with a description of its training camp in Muridke, Pakistan, reveal how the failure of Indian intelligence agencies landed Mumbai in the quagmire of terrorism. Paying homage to the brave security officers who lost their lives fighting the terrorists, 26/11 Mumbai Attacked reiterates the chilling reality that India is under grave threat and the clock is ticking before the next big attack.

Proceedings of the International Conference on ISMAC in Computational Vision and Bio-Engineering 2018 (ISMAC-CVB) Durai Pandian 2019-01-01 These are the proceedings of the International Conference on ISMAC-CVB, held in Palladam, India, in May 2018. The book focuses on research to design new analysis paradigms and computational solutions for quantification of information provided by object recognition, scene understanding of computer vision and different algorithms like convolutional neural networks to allow computers to recognize and detect objects in images with unprecedented accuracy and to even understand the relationships between them. The proceedings treat the convergence of ISMAC in Computational Vision and Bioengineering technology and includes ideas and techniques like 3D sensing, human visual perception, scene understanding, human motion detection and analysis, visualization and graphical data presentation and a very wide range of sensor modalities in terms of surveillance, wearable applications, home automation etc. ISMAC-CVB is a forum for leading academic scientists, researchers and research scholars to exchange and share their experiences and research results about all aspects of computational vision and bioengineering.

Yugantar: The Dream of Bharatavarsha Takes Shape 2300 Years Ago Raghavan Srinivasan 2010-11-25 The fourth century BCE is full of dangers and opportunities. Old republics are giving way to empires and cities. 'Naastik' sects are challenging the established varna system. The intellectual life of India is bristling like new shoots after the monsoon. The domination of the Kshatriyas and the Brahmanas is being challenged. State power is up for grabs. And the Macedonians are at the gates! Most people believe that Bharatavarsha is only a dream. But not the Yugantar, a brotherhood of the wisest and most selfless thinkers of ancient India. Interesting turn of events bring ordinary people from different parts of the subcontinent into the fold of the Yugantar -- a rebel blacksmith from Ujjayini, a Siddha doctor from Madurai; a doughty mariner from Muziris; a trader from Pataliputra and a widow run from Kaushambi. They represent a microcosm of the sub-continent. Each of them is drawn towards the Yugantar by a strange turn of events. Each has a prowess which the Yugantar can mould into a formidable force. They converge in Takshashila, the centre of learning and transformation. This is the story of how their wit and determination contribute to a united Bharatavarsha.

Issues in Urban Development Dr. R. N. Sharma 2001 "The genesis of Navi Mumbai in 1970 was a result of the much felt need by the Maharashtra government to develop a new metro-centre as a counter magnet to the mega city - Bombay (now Mumbai). Since three decades had elapsed, it was considered pertinent to put together different perspectives on the evolution of Navi Mumbai. For this purpose, distinguished planners, administrators and academics—directly or indirectly associated with the project—assembled at a seminar organised by the Tata Institute of Social Sciences, Mumbai in 1999. The book, which is an outcome of the seminar, is invaluable for all those interested in urban planning, urban sociology and economy of developed human settlements. It provides valuable data on various socio-economic and planning aspects involved in shaping of the new city."

Introduction to Information Retrieval Christopher D. Manning 2008-07-07 Class-tested and coherent, this textbook teaches classical and web information retrieval, including web search and the related areas of text classification and text clustering from basic concepts. It gives an up-to-date treatment of all aspects of the design and implementation of systems for gathering, indexing, and searching documents; methods for evaluating systems; and an introduction to the use of machine learning methods on text collections. All the important ideas are explained using examples and figures, making it perfect for introductory courses in information retrieval for advanced undergraduates and graduate students in computer science. Based on feedback from extensive classroom experience, the book has been carefully structured in order to make teaching more natural and effective. Slides and additional exercises (with solutions for lecturers) are also available through the book's supporting website to help course instructors prepare their lectures.

**A BETTER INDIA A BETTER WORLD** N R Narayana Murthy 2010-03-08 Visit the website for A Better India; A Better World; here. With one of the highest GDP growth rates in the world and an array of recent achievements in technology, industry and entrepreneurship, India strides confidently towards the future. But, in the world 's largest democracy, not everyone is equally fortunate. More than 300 million Indians are still prey to hunger; illiteracy and disease; and 51 per cent of India 's children are still undernourished. What will it take for India to bridge this great divide? When will the fruits of development reach the poorest of the poor; and wipe the tears from the eyes of every man; woman and child; as Mahatma Gandhi had dreamt? And how should this; our greatest challenge ever; be negotiated? In this extraordinarily inspiring and visionary book; N.R. Narayana Murthy; who pioneered; designed and executed the Global Delivery Model that has become the cornerstone of India 's success in information technology services outsourcing; shows us that a society working for the greatest welfare of the greatest number—samasta jananam sukhino bhavantu—must focus on two simple things: values and good leadership. Drawing on the remarkable Infosys story and the lessons learnt from the two decades of post-reform India; Narayana Murthy lays down the ground rules that must be followed if future generations are to inherit a truly progressive nation. Built on Narayana Murthy 's lectures delivered around the world; A Better India: A Better World is a manifesto for the youth; the architects of the future; and a compelling argument for why a better India holds the key to a better world.

**The Scout** Shirish Thorat 2019-01-10 The Scout traces the journey of David Headley, son of a Pakistani aristocrat and an American mother who easily straddled both the Islamic and the western worlds. It is a tale of deception and deceit, of audacity and ingenuity and a detailed account of a man who coldly and systematically conducted a series of reconnaissance missions that perfected the most vicious and daring assault ever on the city of Mumbai. Investigated by two professionals in the field of anti terrorist operations, the Scout is a painstakingly researched and authentic account of the life and times of David Headley right until the time of his arrest whilst collaborating with the Al Qaeda and planning a public massacre in Denmark. The book includes heretofore unknown documents, emails and pictures and exclusive details which offer fascinating reading to everyone from the common man to law enforcement and intelligence officials worldwide.

Design of Intelligent Applications using Machine Learning and Deep Learning Techniques Ramchandra Sharad Mangrulkar 2021-08-15 Machine learning (ML) and deep learning (DL) algorithms are invaluable resources for Industry 4.0 and allied areas and are considered as the future of computing. A subfield called neural networks, to recognize and understand patterns in data, helps a machine carry out tasks in a manner similar to humans. The intelligent models developed using ML and DL are effectively designed and are fully investigated – bringing in practical applications in many fields such as health care, agriculture and security. These algorithms can only be successfully applied in the context of data computing and analysis. Today, ML and DL have created conditions for potential developments in detection and prediction. Apart from these domains, ML and DL are found useful in analysing the social behaviour of humans. With the advancements in the amount and type of data available for use, it became necessary to build a means to process the data and that is where deep neural networks prove their importance. These networks are capable of handling a large amount of data in such fields as finance and images. This book also exploits key applications in Industry 4.0 including: - Fundamental models, issues and challenges in ML and DL. - Comprehensive analyses and probabilistic approaches for ML and DL. - Various applications in healthcare predictions such as mental health, cancer, thyroid disease, lifestyle disease and cardiac arrhythmia. - Industry 4.0 applications such as facial recognition, feather classification, water stress prediction, deforestation control, tourism and social networking. - Security aspects of Industry 4.0 applications suggest remedial actions against possible attacks and prediction of associated risks. - Information is presented in an accessible way for students, researchers and scientists, business innovators and entrepreneurs, sustainable assessment and management professionals. This book equips readers with a knowledge of data analytics, ML and DL techniques for applications defined under the umbrella of Industry 4.0. This book offers comprehensive coverage, promising ideas and outstanding research contributions, supporting further development of ML and DL approaches by applying intelligence in various applications.
