Warnings Unheeded Andy Brown 2016-11-05 The true story of two mass-casualty incidents that occurred within days of each other at a US Air Force base. Using the words of the people who experienced the tragedies, the book provides in-depth look at the before, during and after of a preventable active-shooter incident and an avoidable fatal plane crash. The base psychiatrist knew the airman was dangerous. "This is the kind of patient who ... one day ... he's going to come back and kill you." Aircrews knew the rogue pilot was dangerous. "We predicted the worst air-show disaster in history when we found out that he was gonna fly." Written by Andy Brown, the man who ended the killing spree, the result of more than seven years of research. Brown "masterfully weaves" the two stories together in a powerful narrative. He also reveals the preparations he made that enabled him to end a pistol-versus-rifle gunfight with a 70 yard shot from his handgun. Part true crime, part law-enforcement biography memoir and part military history. Warnings Unheeded is presented in an objective style that shows what can happen when authorities become complacent, when the precursors of violence are ignored and the lessons from history are forgotten.

Alms David J. Downs 2016-04-15 Christianity has often understood the death of Jesus on the cross as the sole means for forgiveness of sin. Despite this tradition, David Downs traces the early and sustained presence of yet another means by which Christians imagined atonement for sin: merciful care for the poor. In *Alms: Charity, Reward, and Atonement in Early Christianity*, Downs begins by considering the economic context of almsgiving in the Greco-Roman world, a context in which the overwhelming reality of poverty cultivated the formation of relationships of reciprocity and solidarity. Downs then provides detailed examinations of almsgiving and the rewards associated with it

in the Old Testament, Second Temple Judaism, and the New Testament. He then attends to early Christian texts and authors in which a theology of atoning almsgiving is developed-- 2 Clement, the Didache, the Epistle of Barnabas, Polycarp, Clement of Alexandria, Origen, and Cyprian. In this historical and theological reconstruction, Downs outlines the emergence of a model for the atonement of sin in Christian literature of the first three centuries of the Common Era, namely, atoning almsgiving, or the notion that providing material assistance to the needy cleanses or covers sin. Downs shows that early Christian advocacy of almsgiving's atoning power is located in an ancient economic context in which fiscal and social relationships were deeply interconnected. Within this context, the concept of atoning almsgiving developed in large part as a result of nascent Christian engagement with scriptural traditions that present care for the poor as having the potential to secure future reward, including heavenly merit and even the cleansing of sin, for those who practice mercy. Downs thus reveals how sin and its solution were socially and ecclesiologically embodied, a vision that frequently contrasted with disregard for the social body, and the bodies of the poor, in Docetic and Gnostic Christianity. Alms, in the end, illuminates the challenge of reading Scripture with the early church, for numerous patristic witnesses held together the conviction that salvation and atonement for sin come through the life, death, and resurrection of Jesus and the affirmation that the practice of mercifully caring for the needy cleanses or covers sin. Perhaps the ancient Christian integration of charity, reward, and atonement has the potential to reshape contemporary Christian traditions in which those spheres are separated.

Regression Graphics R. Dennis Cook 2009-09-25 An exploration of regression graphics through computer graphics. Recent developments in computer technology have stimulated new and exciting uses for graphics in statistical analyses. Regression Graphics, one of the first graduate-level textbooks on the subject, demonstrates how statisticians, both theoretical and applied, can use these exciting innovations. After developing a relatively new regression context that requires few scope-limiting conditions, Regression Graphics guides readers through the process of analyzing regressions graphically and assessing and selecting models. This innovative reference makes use of a wide range of graphical tools, including 2D and 3D scatterplots, 3D binary response plots, and scatterplot matrices. Supplemented by a companion ftp site, it features numerous data sets and applied examples that are used to elucidate the theory. Other important features of this book include: * Extensive coverage of a relatively new regression context based on dimension-reduction subspaces and sufficient summary plots * Graphical regression, an iterative visualization process for constructing sufficient regression views *

Graphics for regressions with a binary response * Graphics for model assessment, including residual plots * Net-effects plots for assessing predictor contributions * Graphics for predictor and response transformations * Inverse regression methods * Access to a Web site of supplemental plots, data sets, and 3D color displays. An ideal text for students in graduate-level courses on statistical analysis, Regression Graphics is also an excellent reference for professional statisticians.

Scribes, Visionaries, and the Politics of Second Temple Judea Richard A. Horsley 2007-01-01 Judaism and Christianity both arose in times of empire, with roots in Persian, Hellenistic, and Roman periods. In order to understand these religious movements, we must first understand the history and society of these imperial cultures. In these formative years, wisdom and apocalyptic traditions flourished as two significant religious forms. In Scribes, Visionaries, and the Politics of Second Temple Judea, distinguished New Testament scholar Richard A. Horsley analyzes the function and meaning of these religious movements within their social context, providing essential background for the development of early Judaism and early Christianity. It is an ideal textbook for classes on the rise of Judaism or the Second Temple period, as well as the Dead Sea Scrolls and Apocrypha.

The student book includes: Chapter opening pages which include the key prescribed focus area for the chapter and a clear distinction between essential and additional

content; Updated and revised content, photos, illustrations and 'science clip' boxes in a format that is easy to read and follow; Unit questions under headings that are structured in a hierarchical progression using Bloom's Revised Taxonomy; Additional questions which include research, creative writing, investigations and internet activities; Practical activities at the end of each unit allowing teachers to choose when to do practical work.; Student CD which contains an electronic version of the student book.

Slave Stealers Timothy Ballard 2018-09-04 Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, *Incidents in the Life of a Slave Girl*, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all.

Global Tax Fairness Thomas Pogge 2016-02-04 This book addresses sixteen different reform proposals that are urgently needed to correct the fault lines in the international tax system as it exists today, and which deprive both developing and developed countries of critical tax resources. It offers clear and concrete ideas on how the reforms can be achieved and why they are important for a more just and equitable global system to prevail. The key to reducing the tax gap and consequent human rights deficit in poor countries is global financial transparency. Such transparency is essential to curbing illicit financial flows that drain less developed countries of capital and tax revenues, and are an impediment to sustainable development. A major break-through for financial transparency is now within reach. The policy reforms outlined in this book not only advance tax justice but also protect human rights by curtailing illegal activity and making available more resources for development. While the reforms are realistic they require both political and an informed and engaged civil society that can put pressure on governments and policy makers to act.

Introduction to Radar Using Python and MATLAB Lee Andrew (Andy) Harrison 2019-10-31 This comprehensive resource provides readers with the tools necessary to perform analysis of various waveforms for use in radar systems. It provides information about how to produce synthetic aperture (SAR) images by giving a tomographic formulation and implementation for SAR imaging. Tracking filter fundamentals, and each parameter associated with the filter and how each affects tracking performance are also presented. Various radar cross section measurement techniques are covered, along with waveform selection analysis through the study of the ambiguity function for each particular waveform from simple linear frequency modulation (LFM) waveforms to more complicated coded waveforms. The text includes the Python tool suite, which allows the reader to analyze and predict radar performance for various scenarios and applications. Also provided are MATLAB® scripts corresponding to the Python tools. The software includes a user-friendly graphical user interface (GUI) that provides visualizations of the concepts being covered. Users have full access to both the Python and MATLAB source code to modify for their application. With examples using the tool suite are given at the end of each chapter, this text gives readers a clear understanding of how important target scattering is in areas of target detection, target tracking, pulse integration, and target discrimination.

Sin Gary A. Anderson 2009-09-29 What is sin? Is it simply wrongdoing? Why do its effects linger over time? In this sensitive, imaginative, and original work, Gary Anderson shows how changing conceptions of sin

and forgiveness lay at the very heart of the biblical tradition. Spanning nearly two thousand years, the book brilliantly demonstrates how sin, once conceived of as a physical burden, becomes, over time, eclipsed by economic metaphors. Transformed from a weight that an individual carried, sin becomes a debt that must be repaid in order to be redeemed in God's eyes. Anderson shows how this ancient Jewish revolution in thought shaped the way the Christian church understood the death and resurrection of Jesus and eventually led to the development of various penitential disciplines, deeds of charity, and even papal indulgences. In so doing it reveals how these changing notions of sin provided a spur for the Protestant Reformation. Broad in scope while still exceptionally attentive to detail, this ambitious and profound book unveils one of the most seismic shifts that occurred in religious belief and practice, deepening our understanding of one of the most fundamental aspects of human experience.

Crime Prevention Through Environmental Design Lawrence Fennelly
2013-06-19 Crime Prevention Through Environmental Design, 3e is a vital book for anyone involved in architectural design, space management, and urban planning. The concepts presented in this book explain the link between design and human behavior. Understanding this link can enable a planner to use natural environmental factors to minimize loss and crime and to maximize productivity. This practical guide addresses several environmental settings, including major event facilities, small retail establishments, downtown streets, residential areas, and playgrounds. A one-stop resource with explanations of criminal behavior and the historical aspects of design, it teaches both the novice and the expert in crime prevention how to use the environment to affect human behavior in a positive manner. Fully updated with substantial new material in each chapter Useful illustrations describe the design and layout concepts in an easy to understand manner Written by a well-qualified author in the field of crime prevention

Giphantia CHARLES-FRANCOIS. TIPHAIGNE DE LA ROCHE 2019-11-28 Tiphaigne de la Roche (1722-74) was a French physician and author. He was born in Montebourg in the Cotentin Peninsula of Normandy in north-west France, studied medicine at the University of Caen and began practising as a physician in 1744. His novels, written for the most part anonymously, take place in the wake of two of the 18th century's great philosophical movements of Rationalism and Illuminism, and often combine scientific considerations with cabalistic, magical and alchemical ones. He is noted for anticipating many social and scientific inventions including photography, synthetic food and television. This work was first published in 1760 and the title in the original French, Giphantie, is an anagram of the author's given name. Reprinted from the English translation of 1761.

Three By Echenoz Jean Echenoz 2014-06-03 A single volume that gathers together three of the most remarkable novels from Jean Echenoz, the "most distinctive French voice of his generation" (The Washington

Post), *Three* by Echenoz demonstrates the award-winning author's extraordinary versatility and elegant yet playful style at its finest. "A parodic thriller sparkling with wit" (L'Humanité), *Big Blondes* probes our universal obsession with fame as a television documentary producer tries to track down a renowned singer who has mysteriously disappeared. A darkly comedic, noir-style tour de force, it finally answers the age-old question: do blondes have more fun? "Fluid, never forced...like a garment that fits beautifully even inside-out" (Elle), *Piano* brings Dante's *Inferno* to contemporary Paris, following Max Delmarc, a concert pianist suffering from paralyzing stage fright and alcoholism, as he meets his untimely death and descends through purgatory—part luxury hotel, part minimum-security prison—into a modern vision of hell. *Running* is "a small wonder of writing and humanity" (L'Express)—a portrait of the legendary Czech athlete Emil Zátopek, who became a national hero, winning three gold medals at the 1952 Helsinki Olympics even as he was compelled to face the unyielding realities of life under an authoritarian regime.

Gender, Generations, and Communism in Central and Eastern Europe and Beyond Anna Artwińska 2020-07-17 Communism in twentieth-century Europe is predominantly narrated as a totalitarian movement and/or regime. This book aims to go beyond this narrative and provide an alternative framework to describe the communist past. This reframing is possible thanks to the concepts of generation and gender, which are used in the book as analytical categories in an intersectional overlap. The publication covers twentieth-century Poland, Czechoslovakia/Czech Republic, the Soviet Union/Russia, former Yugoslavia, Turkish communities in West Germany, Italy, and Cuba (as a comparative point of reference). It provides a theoretical frame and overview chapters on several important gender and generation narratives about communism, anticommunism, and postcommunism. Its starting point is the belief that although methodological reflection on communism, as well as on generations and gender, is conducted extensively in contemporary research, the overlapping of these three terms is still rare. The main focus in the first part is on methodological issues. The second part features studies which depict the possibility of generational-gender interpretations of history. The third part is informed by biographical perspectives. The last part shows how the problem of generations and gender is staged via the medium of literature and how it can be narrated.

Charity Gary A. Anderson 2013-08-27 In this reappraisal of charity in the biblical tradition, Anderson argues that the poor constituted the privileged place where Jews and Christians met God. He shows how charity affirms the goodness of the created order; the world was created through charity and therefore rewards it.

A Tribute to a Beloved Lady Christina Bush 2007-11-30 I lost my dear mother to stomach cancer in 1994. Before she passed away she made a request to me that I some day take her poetry and my works of art and put them together for the world to see. This book has been created in

her memory and honor. She was a remarkable lady and a wonderful mother. I hope her words touch and inspire all who read them.

Ellison Wonderland Harlan Ellison 2014-04-29 Tales of terror and wonder from a winner of the Nebula, Hugo, Edgar, Bram Stoker, and many other awards. Originally published in 1962 and updated in later decades with a new introduction, Ellison Wonderland contains sixteen masterful stories from the author's early career. This collection shows a vibrant young writer with a wide-ranging imagination, ferocious creative energy, devastating wit, and an eye for the wonderful and terrifying and tragic. Among the gems are "All the Sounds of Fear," "The Sky Is Burning," "The Very Last Day of a Good Woman," and "In Lonely Lands." Though they stand tall on their own merits, they also point the way to the sublime stories that followed soon after and continue to come even now, more than fifty years later.
