Conrad II, 990-1039 Herwig Wolfram 2006 In this biography of the German emperor Conrad II (990&–1039), internationally renowned medievalist Herwig Wolfram paints a fascinating portrait of a consummate politician set against the background of a Europe entering a new millennium. Conrad was the founder of the Salian Dynasty, under whose almost century-long dominion Germany became the most powerful state in Western Europe. He was also the first emperor of the high Middle Ages to rule the three kingdoms of Germany, Italy, and Burgundy. Conrad&'s reign marked the triumph of the concept of &"kingdom&" and the zenith of what has been termed &"imperial grandeur.&" He broadened the internal bases of imperial power and brought the full weight of his office to bear upon popes, clerics, and abbots in the pursuit of his ecclesiastical policies. His astounding ability to achieve his political goals was practically unparalleled among the emperors of the High Middle Ages. Wolfram sees Conrad as a politician in almost the modern sense of the word, capable of exploiting the political, social, and economic structures of his day in order to exert his authority and marginalize his opponents. The result is an intimate portrait filled with fresh insights about Conrad and his consort, Gisela, who&—as Wolfram demonstrates&—played an influential advisory role with her husband. First published in 2000, this work demonstrates Wolfram&'s masterly command of the sources and the storyteller&'s craft, making Conrad II a compelling history of an emperor and his magnificent epoch.

Patterns of Thought in Africa and the West Robin Horton 1993-04-22 The anthropologist Robin Horton is widely regarded as one of the most creative and critical thinkers of his generation. This collection of some of his classic papers on African religion, written between l960 and l990 is also a wide-ranging inquiry into religious thought, particularly its relationship to aesthetic and scientific thought. Horton criticizes recent orthodoxies in this area, and instead proposes an "Intellectualist" alternative that stresses similarities between the religious and the scientific.

Radar Instruction Manual United States. Maritime Administration 2005 Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies.Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration?s three region schools.It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook.This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation.Robert J. Critical Mission Thomas Carothers 2004 Demand for practical knowledge and lessons about how the United States and other countries can more effectively promote democracy around the world has never been higher. This timely book by Thomas Carothers, one of the foremost authorities worldwide on democracy building, helps meet that need. Critical Mission draws together a wide-ranging set of Carothers's many seminal, widely cited essays, organized around four vital themes: the role of democracy promotion in U.S. foreign policy the core elements of democracy aid the state of democracy in the world the new U.S. push to promote democracy in the Middle EastFrom puncturing myths about promoting civil society to sizing up the prospects for democracy in the Arab world, Carothers is consistently penetrating, incisive, and challenging to policymakers, democracy activists, and scholars alike.The book also includes the only up-to-date, comprehensive bibliography on democracy promotion.

Personality Psychology: Domains of Knowledge About Human Nature Randy Larsen 2009-10-28 Using a novel organizational framework, one that emphasizes domains of knowledge about human nature, this trusted text presents the field of contemporary personality psychology as a collection of interrelated topics and themes. The emphasis, as always, is on the scientific basis of understanding human nature. The fourth edition continues to answer the needs of instructors by covering topics that do not fit into the framework of theory-based texts. It features updates on cutting edge trends in personality psychology in relation to culture, gender, evolution, genetics, emotion, self, health psychology, and personality disorders, while providing a solid foundation in the more traditional areas of trait psychology, psychoanalysis, and cognitive and social approaches to personality. Presented in a colorful and accessible format, the provides exercises, personality questionnaires, "Closer Look" boxes, current news boxes, and many charts, graphs, and photos to engage students in the material.

Benedictine Maledictions Lester K. Little 1993 In this long-awaited book, the result of more than a decade of research, Lester K. Little reconstructs and explores the phenomenon of officially sanctioned religious cursing in medieval Europe. He focuses on a church service, called in Latin either clamor or maledictio, used by monastic communities (primarily in Francia) between approximately 990 and 1250. Threatened by bands of heavily armed knights in a period of incessant civil strife, communities of monks, nuns, and cathedral clerics retaliated by cursing their enemies in a formal religious ceremony. After presenting the formulas the monks used in such cursing, Little explores the social, political, and juridical contexts in which these curses were used and explains how Christian authorities who condemned cursing could also authorize it. He demonstrates that these Benedictine maledictions often played a decisive role in resolving the monks' frequent property disputes with local notables, especially knights. Little's approach to his subject is topical. After determining the clamor's sources, he takes up its kinship with such related liturgy as the humiliation of saints and then shows where and to what end it was used. By the conclusion of his work, he has recreated the whole culture of the medieval clamor, and in the process he has illuminated many other aspects of medieval social and legal culture.

Utilizing Drupal, you can create your own personal blog, a community driven site like Slashdot, or any other content oriented web site you can imagine. Pro Drupal Development is a book geared to professionals that need to deploy and customize Drupal. This book deeply delves into the internals of the Drupal system and teaches the reader everything they will need to know to deploy a highly customized and optimized Drupal installation.

Inner Experiences: Theory, Measurement, Frequency, Content, and Functions Alain Morin 2016-02-26 One fundamental topic of scientific inquiry in psychology is the study of what William James called the "stream of consciousness", our ongoing experience of the world and ourselves from within—our inner experiences. These internal states (aka "stimulus-independent thoughts") include inner speech, mental imagery, feelings, sensory awareness, internally produced sounds or music, unsymbolized thinking, and mentalizing (thinking about others' mental states). They may occur automatically during mind-wandering (daydreaming) and resting-state episodes, and may focus on one's past, present, or future ("mental time travel"--e.g., autonoetic consciousness). Inner experiences also may take the form of intrusive or ruminative thoughts. The types, characteristics, frequency, content, and functions of inner experiences have been studied using a variety of traditional methods, among which questionnaires, thought listing procedures (i.e., open-ended self-reports), thinking aloud techniques, and daily dairies. Another approach, articulatory suppression, consists in blocking participants' use of verbal thinking while completing a given task; deficits indicate that inner speech plays a causal role in normal task completion. Various thought sampling approaches have also been developed in an effort to gather more ecologically valid data. Previous thought sampling studies have relied on beepers that signal participants to report aspects of their inner experiences at random intervals. More recent studies are exploiting smartphone technology to easily and reliably probe randomly occurring inner experiences in large samples of participants. These various measures have allowed researchers to learn some fundamental facts about inner experiences. To illustrate, it is becoming increasingly clear that prospection (future-oriented thinking) greatly depends on access to autobiographical memory (past-oriented thinking), where recollection of past scenes is used as a template to formulate plausible future scenarios. The main goal of the present Research Topic was to offer a scientific platform for the dissemination of current high-quality research pertaining to inner experiences. Although data on all forms of inner experiences were welcome, reports on recent advances in inner speech research were particularly encouraged. Here are some examples of topics of interest: (1) description and validation of new scales, inventories, questionnaires measuring any form of inner experience; (2) novel uses or improvements of existing measures of inner experiences; (3) development of new smartphone technology facilitating or broadening the use of cell phones to sample inner experiences; (4) frequency, content, and functions of various inner experience; (5) correlations between personality or cognitive variables and any aspects of inner experiences; (6) philosophical or theoretical considerations pertaining to inner experiences; and (7) inner experience changes with age.

Consumer Behaviour Leon G. Schiffman 2001 This edition takes into account the research from Australia available through bodies such as ANZMAC and Australasian Marketing Journal. It provides an explanation of what consumer behaviour variables are and the types and importance of each.

Game Engine Black Book: DOOM v1.1 Fabien Sanglard 2018 It was early 1993 and id Software was at the top of the PC gaming industry. Wolfenstein 3D had established the First Person Shooter genre and sales of its sequel Spear of Destiny were skyrocketing. The technology and tools id had taken years to develop were no match for their many competitors. It would have been easy for id to coast on their success, but instead they made the audacious decision to throw away everything they had built and start from scratch. Game Engine Black Book: Doom is the story of how they did it. This is a book about history and engineering. Don't expect much prose (the author's English has improved since the first book but is still broken). Instead you will find inside extensive descriptions and drawings to better understand all the challenges id Software had to overcome. From the hardware -- the Intel 486 CPU, the Motorola 68040 CPU, and the NeXT workstations -- to the game engine's revolutionary design, open up to learn how DOOM changed the gaming industry and became a legend among video games.

Hard Drive Bible Martin Bodo 1996 THE HARD DRIVE BIBLE, EIGHTH EDITION is the definitive reference book for anyone who deals with personal computer data storage devices of any kind. This comprehensive work covers installations, drive parameters, & set up information for thousands of Hard Disk, Optical, DAT Tape, & CD-ROM Drives. A concise history of data storage devices is followed by the most expansive compilation of technical data offered to the public today. Specifications, drawings, charts & photos cover jumper settings, cabling, partitioning & formatting of disk drives. SCSI commands & protocols are addressed, in addition to chapters revealing the intricacies of different interface standards & common troubleshooting procedures. THE HARD DRIVE BIBLE contains the answers to anyone's questions concerning the purchase, installation & use of modern digital data storage devices. The difficulties caused by compatibility mismatches are addressed & solutions are offered. Also featured are controller card information & performance ratings, as well as valuable tips on increasing drive performance & reliability through software. THE HARD DRIVE BIBLE is published by Corporate Systems Center, one of the leaders in the digital storage device field. A CD-ROM included with the book carries CSC's drive performance test software & formatting tools, as well as thousands of drive parameters, specifications, & technical drawings. To order contact: Corporate Systems Center, 1294 Hammerwood Avenue, Sunnyvale, CA 94089; 408-743-8787.

Grandad Mandela Ambassador Zindzi Mandela 2018-06-28 "...profoundly moving..." -Publishers Weekly Nelson Mandela's two great-grandchildren ask their grandmother, Mandela's youngest daughter, 15 questions about their grandad – the global icon of peace and forgiveness who spent 27 years in prison. They learn that he was a freedom fighter who put down his weapons for the sake of peace, and who then became the President of South Africa and a Nobel Peace Prize-winner, and realise that they can continue his legacy in the world today. Seen through a child's perspective, and authored jointly by Nelson Mandela's great-grandchildren and daughter, this amazing story is told as never before to celebrate what would have been Nelson's Mandela 100th birthday.

Coercion, Capital, and European States, AD 990-1990 Charles Tilly 1990-01-01 This is at once an account and an explanation of the evolution of European states during the present millennium. The central problem addressed by the author concerns the great variety in the kinds of state that have prevailed in Europe since AD 990....Professor Tilly shows how interactions between the wielders of power on the one hand and the manipulators of capital on the other resulted in three state formations each of which prevailed over long periods -- tribute-taking empires, systems of fragmented sovereignty, and national states.

<u>Medical Anthropology</u> Andrea S. Wiley 2009 Intended as the primary text for introductory courses on medical anthropology, this book integrates human biological data relevant to health and disease with both evolutionary theory and the social environments that more often than not produce major challenges to health and survival. Becausestudents who take this fastest-growing anthropology course come from a variety of disciplines (anthropology, biology, especially pre-med students, and health sciences, especially), the text does not assume anything beyond a basic high-school level familiarity with human biology and anthropology. Theauthors first present basic biological information on a particular health condition and then expand their analysis to include evolutionary, historical, and cross-cultural perspectives. Among the topics covered are nutrition, infectious disease, stress, reproductive health, behavioral disease, aging,race/racism and health, mental health, and healers and healing.

Information Technology for Management Henry C. Lucas 2000 Information Technology for Management 7/e prepares students how to take an active role in the design, use, and management of information systems and technology by providing a broad treatment of issues relating to an organization, the technology used, and how systems are developed. The main focus deals with applying technology in an organization or transforming existing systems with the use of information technology.

<u>The Road to the 707</u> William H. Cook 1991 This book outlines the critical engineering discoveries leading to the jet transport age - from observations of birds in flight to modern jet transports. Starting with the Wright Brothers, it traces a path to the Boeing XB-47 swept-wing jet bomber, ending with the first generation of commercial jet transports: the Comet, the Convair 990, the DC-8, and the 707. Chapters include: The Pioneers; Airmail and the Early Transports; The 247 Airliners; The DC-3 and the Four-Engine Transports; The Four-Engine Bombers; The War Years; The Turbo-Jet Engine; The GE TG-180 Jet Engine; The Boeing High-Speed Wind Tunnel; The Swept Wing; The Jet Bomber; The Dash-80 Prototype; The 707-DC-8 Competition; and The Fan Engine. A clearly-written and easy-to-read book that is a must-read for all aircraft enthusiasts. William H. Cook started working for Boeing Engineering in 1938. There he held many prominent positions, including Manager of High-speed Wind Tunnel Design; B-29 Assistant Project Engineer; XB-47 Aerodynamics Unit Chief; and Chief of Technical Staff, Transport Division. Cook retired in 1974, but his engineering expertise is still in use today.

Technology for Adaptive Aging National Research Council 2004-04-25 Emerging and currently available technologies offer great promise for helping older adults, even those without serious disabilities, to live healthy, comfortable, and productive lives. What technologies offer the most potential benefit? What challenges must be overcome, what problems must be solved, for this promise to be fulfilled? How can federal agencies like the National Institute on Aging best use their resources to support the translation from laboratory findings to useful, marketable products and services? Technology for Adaptive Aging is the product of a workshop that brought together distinguished experts in aging research and in technology to discuss applications of technology to communication, education and learning, employment, health, living environments, and transportation for older adults. It includes all of the workshop papers and the report of the committee that organized the workshop. The committee report synthesizes and evaluates the points made in the workshop papers and recommends priorities for federal support of translational research in technology for older adults.

<u>Vibration-based Condition Monitoring</u> Robert Bond Randall 2011-03-25 "Without doubt the best modern and up-to-date text on the topic, wirtten by one of the world leading experts in the field. Should be on the desk of any practitioner or researcher involved in the field of Machine Condition Monitoring" Simon Braun, Israel Institute of Technology Explaining complex ideas in an easy to understand way, Vibration-based Condition Monitoring provides a comprehensive survey of the application of vibration analysis to the condition monitoring of machines. Reflecting the natural progression of these systems by presenting the fundamental material and then moving onto detection, diagnosis and prognosis, Randall presents classic and state-of-the-art research results that cover vibration signals from rotating and reciprocating machines; basic signal processing techniques; fault detection; diagnostic techniques, and prognostics. Developed out of notes for a course in machine condition monitoring given by Robert Bond Randall over ten years at the University of New South Wales, Vibration-based Condition Monitoring: Industrial, Aerospace and Automotive Applications is essential reading for graduate and postgraduate students/ researchers in machine condition monitoring and diagnostics as well as condition monitoring practitioners and machine manufacturers who want to include a machine monitoring service with their product. Includes a number of exercises for each chapter, many based on Matlab, to illustrate basic points as well as to facilitate the use of the book as a textbook for courses in the topic. Accompanied by a website www.wiley.com/go/randall housing exercises along with data sets and implementation code in Matlab for some of the methods as well as other pedagogical aids. Authored by an internationally recognised authority in the area of condition monitoring.

Global Tax Fairness Thomas Pogge 2016-02-04 This book addresses sixteen different reform proposals that are urgently needed to correct the fault lines in the international tax system as it exists today, and which deprive both developing and developed countries of critical tax resources. It offers clear and concrete ideas on how the reforms can be achieved and why they are important for a more just and equitable global system to prevail. The key to reducing the tax gap and consequent human rights deficit in poor countries is global financial transparency. Such transparency is essential to curbing illicit financial flows that drain less developed countries of capital and tax revenues, and are an impediment to sustainable development. A major break-through for financial transparency is now within reach. The policy reforms outlined in this book not only advance tax justice but also protect human rights by curtailing illegal activity and making available more resources for development. While the reforms are realistic they require both political and an informed and engaged civil society that can put pressure on governments and private actors to act.

A Policy on Geometric Design of Highways and Streets, 2018 2018 Highway engineers, as designers, strive to meet the needs of highway users while maintaining the integrity of the environment. Unique combinations of design controls and constraints that are often conflicting call for unique design solutions. A Policy on Geometric Design of Highways and Streets provides guidance based on established practices that are supplemented by recent research. This document is also intended as a comprehensive reference manual to assist in administrative, planning, and educational efforts pertaining to design formulation

FM 2012: Formal Methods Dimitra Giannakopoulou 2012-08-21 This book constitutes the refereed proceedings of the 18th International Symposium on Formal Methods, FM 2012, held in Paris, France, in August 2012. The 28 revised full papers presented together with 7 tool papers and 3 invited talks were carefully reviewed and selected from numerous submissions. The papers cover several aspects of formal methods, including verification, synthesis, runtime monitoring, testing and controller synthesis, as well as novel applications of formal methods in interesting domains such as satellites, autonomous vehicles and disease dynamics.

Antistatic Sprays National Aeronautics and Space Adm Nasa 2018-10-25 Antistatic sprays from several different manufacturers are examined. The sprays are examined for contamination potential (i.e., outgassing and nonvolatile residue), corrosiveness on an aluminum mirror surface, and electrostatic effectiveness. In addition, the chemical composition of the antistatic sprays is determined by infrared spectrophotometry, mass spectrometry, and ultraviolet spectrophotometry. The results show that 12 of the 17 antistatic sprays examined have a low contamination potential. Of these sprays, 7 are also noncorrosive to an aluminum surface. And of these, only 2 demonstrate good electrostatic properties with respect to reducing voltage accumulation; these sprays did not show a fast voltage dissipation rate however. The results indicate that antistatic

sprays can be used on a limited basis where contamination potential, corrosiveness, and electrostatic effectiveness is not critical. Each application is different and proper evaluation of the situation is necessary. Information on some of the properties of some antistatic sprays is presented in this document to aid in the evaluation process. Ming, James E. Goddard Space Flight Center
