An Anthology of Informal Latin, 200 BC-AD 900 Nicolaus 2016-09-26 This book contains over fifty passages of Latin from 200 BC to AD 900, with a translation and linguistic commentary. It is not intended as an elementary reader (though suitable for university courses), but as an illustrative Latin covering more than a millennium, with almost every century represented. Conventional histories cite constructions out of context, which does not give a sense of the period, genre, stylistic aims and idiosyncrasies of specific passages. 'Informal' texts, particularly if they portray talk, reflection, and variety and change better than texts adhering to classicising norms. Some of the texts are recent discoveries or little known. Writing tablets and papyrus documents are represented, as are literary and technical texts down to the early medieval period, when striking changes appear. The commentaries identify discontinuities and phenomena of long duration. Readers will learn much about the diversity and development of Latin.

Who's Your Daddy? Linda Sandoval 2010-05-11 Lila Moreno and her two best friends, Meryl Morgenstern are social mutants. Not because of who they are, but who their guy-repellent daddies are. Lila's dad is the chief of police; Meryl's dad is the football coach, the driver's ed instructor, and the principal at the high school; and Caressa's dad is a famous musician. Boys are too terrified and intimidated by the girls' dads to come anywhere near them. So Lila, Meryl, and Caressa decide to take matters into their own hands. On the night of homecoming, instead of going dateless, they hold a Celtic ritual that shows single young women who their soul mates are. The dinner doesn't go exactly as planned, but never could they guess the loser's alternative to homecoming would change their lives.

The Divine Office in the Latin Middle Ages E. Fassler 2000-08-17 The Divine Office--the cycle of daily worship other than the Mass--is the central source of liturgical texts and music from the Latin Middle Ages. However, its richness, the great diversity of its manuscripts, and its many variations from community to community have made it difficult to study, and it remains largely unexplored terrain. This volume is a practical guide to the Divine Office for students and scholars throughout the field of medieval studies. The book surveys the many questions related to the Office and presents the

tools and research methods now used in the field. Beginning with the Office in the early Middle Ages, the book covers manuscript sources and regional developments and variations; the relationship between the Office, the Mass, and other ceremonies and repertoires; and the deep link between the Office and medieval hagiography. The book concludes with a discussion of recent technical advances for handling the enormous amounts of data in the Office and its performance, in particular CANTUS, the vast electronic database developed by Ruth Steiner of Catholic University for the analysis of repertoires. The Divine Office in the Latin Middle Ages is an essential resource for anyone studying medieval liturgy. Its accessible style and comprehensive coverage make it an important basic reference for a wide range of students and scholars in art history, religious studies, social history, literary studies, musicology, and theology.

Differential Equations and Dynamical Systems Perko 2012-12-06 Mathematics is playing an ever more important role in the physical and biological sciences, provoking a blurring of boundaries between scientific disciplines and a resurgence of interest in the modern as well as the classical techniques of applied mathematics. This renewal of interest, both in research and teaching, has led to the establishment of the series: Texts in Mathematics (TAM). The development of new courses is a natural consequence of a high level of excitement on the research frontier as well as such as numerical and symbolic computer systems, dynamical systems, and chaos, mix with and reinforce the traditional methods of applied mathematics. Thus, the purpose of this textbook series is to meet the current and future needs of these advances and encourage the teaching of new courses. We publish textbooks suitable for use in advanced undergraduate and beginning graduate courses, and will complement the Applied Mathematics (AMS) series, which will focus on advanced textbooks and research level monographs. Preface to the Second Edition This book covers those topics necessary for a clear understanding of the qualitative theory of ordinary differential equations and the concept of a dynamical system. It is intended for advanced undergraduates and for beginning graduate students. It begins with a study of linear systems of ordinary differential equations, and then moves to nonlinear systems familiar to the student who has completed a first course in differential equations.

French Cruisers John Jordan 2013-03-04 The French produced some of the most striking and innovative interwar cruiser designs. A large amount of information about these ships has become available over the past twenty years in France, but this book is the first to make this accessible to an English-speaking readership. Part I explains the design philosophy behind each of the classes built after 1922, and outlines the characteristics of each class accompanied by detailed data tables and a comprehensive set of specially-drawn plans based on official documents, as well as carefully-selected photographs. Coverage includes the De Grasse, laid down in August 1939 and completed postwar as an AA cruiser, and also the heavy cruiser of the Louis class intended to follow her, about which little has been published. Part II deals with the historical side, covering not only the eventful careers of these ships, but also explaining the peacetime organisation of the Marine Nationale, the complex politics of this turbulent period and their impact on the ships. Like its highly successful predecessor, French Battleships, this beautifully presented book subtly blends technical and historical analysis to provide a work that must become the standard reference work.

Unriddling the Exeter Riddles Patrick J. Murphy 2011-03-21 The vibrant and enigmatic Exeter Riddles (ca. 960-980) are among the most compelling texts in the field of medieval studies, in part because they lack textually supplied solutions. Indeed, these ninety-five Old English riddles have become so popular that they have even been featured on posters for the London Underground and have inspired a sculpture in downtown Exeter. Modern scholars have responded enthusiastically to the challenge of solving the Riddles, but have generally examined them individually. Few have considered the riddles as a whole or in a broader context. In this book, Patrick Murphy takes an innovative approach, arguing that in order to understand the Riddles more fully, one must step back from the individual puzzles and consider the group in light of the textual and oral traditions from which they emerged. He offers new insights into the nature of the Exeter Riddles' complexity, their intellectual foundations, and their lively use of metaphor.

Simply Imperfect Robyn Griggs Lawrence 2011-05-01 This revised and updated edition of The Wabi-Sabi House recounts the history of this aesthetic philosophy and reveals ways to introduce it into your home. The ancient Japanese philosophy of wabi-sabi is about appreciating simplicity and the superficial—the perfect antidote to modern consumerism and perfectionism. In 2004, author Robyn Griggs Lawrence helped popularize wabi-sabi in North America with her book The Wabi-Sabi House. In Simply Imperfect, Lawrence shows that wabi-sabi is far more than a style of home décor of mind—a way of living modestly in the moment, stripping away the unnecessary, and finding satisfaction in everyday things. Tracing the roots of wabi-sabi from its Zen Buddhist roots to the present day, this beautifully-illustrated book also offers tips on: Clearing clutter and blocking noise salvaged and recycled materials Making and growing things yourself (or supporting local artisans who do) Taking time and space for self-reflection
