The Cultural Cold War Frances Stonor Saunders 2013-11-05 During the Cold War, freedom of expression was vaunted as liberal democracy's most cherished possession—but such freedom was put in service of a hidden agenda. In *The Cultural Cold War*, Frances Stonor Saunders reveals the extraordinary efforts of a secret campaign in which some of the most vocal exponents of intellectual freedom in the West were working for or subsidized by the CIA—whether they knew it or not. Called "the most comprehensive account yet of the [CIA's] activities between 1947 and 1967" by the *New York Times*, the book presents shocking evidence of the CIA's undercover program of cultural interventions in Western Europe and at home, drawing together declassified documents and exclusive interviews to expose the CIA's astonishing campaign to deploy the likes of Hannah Arendt, Isaiah Berlin, Leonard Bernstein, Robert Lowell, George Orwell, and Jackson Pollock as weapons in the Cold War. Translated into ten languages, this classic work—now with a new preface by the author—is "a real contribution to popular understanding of the postwar period" (*The Wall Street Journal*), and its story of covert cultural efforts to win hearts and minds continues to be relevant today.

Britain and International Law in West Africa Inge Van Hulle 2020-10-22 Africa often remains neglected in studies that discuss the historical relationship between international law and imperialism during the nineteenth century. When it does feature, focus tends to be on the Scramble for Africa, and the treaties concluded between European powers and African polities in which sovereignty and territory were ceded. Drawing on a wide range of archival material, Inge Van Hulle brings a fresh new perspective to this traditional narrative. She reviews the use and creation of legal instruments that expanded or delineated the boundaries between British jurisdiction and African communities in West Africa, and uncovers the practicality and flexibility with which international legal discourse was employed in imperial contexts. This legal experimentation went beyond treaties of cession, and also encompassed commercial treaties, the abolition of the slave trade, extraterritoriality, and the use of force. The book argues that, by the 1880s, the legal techniques that were fashioned in the language of international law in West Africa had largely developed their own substantive characteristics. Legal ordering was not done in reference to adjudication before Western courts or the writings of Western lawyers, but in reference to what was deemed politically expedient and practically feasible by imperial agents for the preservation of social peace, commercial interaction, and humanitarian agendas.

Dressing for Altitude Dennis R. Jenkins 2012-08-27 "Since its earliest days, flight has been about pushing the limits of technology and, in many cases, pushing the limits of human endurance. The human body can be the limiting factor in the design of aircraft and spacecraft. Humans cannot survive unaided at high altitudes. There have been a number of books written on the subject of spacesuits, but the literature on the high-altitude pressure suits is lacking. This volume provides a

high-level summary of the technological development and operational use of partial- and full-pressure suits, from the earliest models to the current high altitude, full-pressure suits used for modern aviation, as well as those that were used for launch and entry on the Space Shuttle. The goal of this work is to provide a resource on the technology for suits designed to keep humans alive at the edge of space."--NTRS Web site.

Decolonizing Knowledge Frédérique Apffel-Marglin 1996-04-25 Development failures, environmental degradation and social fragmentation can no longer be regarded as side effects of 'externalities'. They are the toxic consequences of pretensions that the modern Western view of knowledge is a universal neutral view, applicable to all people at all times. The very word 'development' and its cognates 'underdevelopment' and 'developing' confidently mark the 'first' world's as the future of the 'third'. This book argues that the linear evolutionary paradigm of development that comes out of modern Western view of knowledge is a contemporary form of colonialism. The authors - covering topics as diverse as the theory of knowledge underlying the work of John Maynard Keynes, what the renowned British geneticist J.B.S. Haldane was looking for when he migrated to India, the knowledge of Mexican and Indian peasants - propose a pluralistic vision and decolonization of knowledge: the replacement of one-way transfers of knowledge and technology by dialogue and mutual learning.

The Expedition of Humphry Clinker Tobias George Smollett 2005-11-01 Before I was born, [my aunt] had gone such lengths in the way of flirting with a recruiting officer, that her reputation was a little singed. She afterwards made advances to the curate of the parish...-from "To Sir Watkin Phillips, of Jesus college, Oxon, Bath, May 6" An often overlooked but nevertheless important name in the history of the English novel, Tobias Smollett greatly influenced Dickens, with his unsentimental depiction of poverty, and was a favorite of William Makepeace Thackeray, who called The Expedition of Humphry Clinker "the most laughable story that has ever been written since the goodly art of novel-writing began." An early example of the epistolary novel, consisting entirely of letters written between its characters, this is Smollett's last book, completed and published just before his death in 1771. Far less brutal than his earlier work, it is the comic story of Humphry Clinker, a poor lad who joins a touring party of aristocrats on their journey through city and country. Smollett's satire on the well-to-do and the fripperies that consumed their society echoes in countless writers who came after him, from Jane Austen to "Bridget Jones" with her diary. Scottish writer TOBIAS GEORGE SMOLLETT (1721-1771) trained as a surgeon but found far more success as a novelist; he also worked as an editor and translator. Among his works are Roderick Random (1748) and The Adventures of Peregrine Pickle (1751).

Spinifex and Sand David Wynford Carnegie 2022-06-02 "Spinifex and Sand" is a travelogue by David Wynford Carnegie. In 1896-1897, the Hon. David Wynford Carnegie, born in 1871, the youngest son of the Earl of Southesk, led one of the last great expeditions in the exploration of Australia. His route from Lake Darlôt to Halls Creek and return took thirteen months and covered over three thousand miles. Carnegie financed his expedition from the results of a successful gold strike at Lake Darlôt. The following pages profess to be no more than a faithful narrative of five years spent on the goldfields and in the far interior of Western Australia.

Where the Salmon Run Trova Heffernan 2017-05-01 Billy Frank Jr. was an early participant in the fight for tribal fishing rights during the 1960s. Roughed up, belittled, and handcuffed on the riverbank, he emerged as one of the most influential Northwest Indians in modern history. His efforts helped bring about the 1974 ruling by Federal Judge George H. Boldt affirming Northwest tribal fishing rights and allocating half the harvestable catch to them. Today, he continues to support Indian country and people by working to protect salmon and restore the environment. Where the Salmon Run tells the life story of Billy Frank Jr., from his father's influential tales, through the difficult and contentious days of the Fish Wars, to today. Based on extensive interviews with Billy, his family, close advisors, as well as political allies and former foes, and the holdings of Washington State's cultural institutions, we learn about the man behind the legend, and the people who helped him along the way.

History of the Expedition to Russia Philippe-Paul comte de Ségur 1827

The New Urban Frontier Neil Smith 2005-10-26 Why have so many central and inner cities in Europe, North America and Australia been so radically revamped in the last three decades, converting urban decay into new chic? Will the process continue in the twenty-first century or has it ended? What does this mean for the people who live there? Can they

do anything about it? This book challenges conventional wisdom, which holds gentrification to be the simple outcome of new middle-class tastes and a demand for urban living. It reveals gentrification as part of a much larger shift in the political economy and culture of the late twentieth century. Documenting in gritty detail the conflicts that gentrification brings to the new urban 'frontiers', the author explores the interconnections of urban policy, patterns of investment, eviction, and homelessness. The failure of liberal urban policy and the end of the 1980s financial boom have made the end-of-the-century city a darker and more dangerous place. Public policy and the private market are conspiring against minorities, working people, the poor, and the homeless as never before. In the emerging revanchist city, gentrification has become part of this policy of revenge.

U.S. Marines In Vietnam: The Advisory And Combat Assistance Era, 1954-1964 Capt. Robert H. Whitlow 2016-08-09

This is the first of a series of chronological histories prepared by the Marine Corps History and Museums Division to cover the entire span of Marine Corps involvement in the Vietnam conflict. This particular volume covers a relatively obscure chapter in U.S. Marine Corps history—the activities of Marines in Vietnam between 1954 and 1964. The narrative traces the evolution of those activities from a one-man advisory operation at the conclusion of the French-Indochina War in 1954 to the advisory and combat support activities of some 700 Marines at the end of 1964. As the introductory volume for the series this account has an important secondary objective: to establish a geographical, political, and military foundation upon which the subsequent histories can be developed.

The Sailor's Word-book William Henry Smyth 1867

The Writings of Josep Lluís Sert José Luis Sert 2015-01-01 "Josep Lluís Sert (1902-1983) was the last president of CIAM (International Congresses of Modern Architecture) and dean of the Harvard University Graduate School of Design from 1953 to 1969, where he founded the discipline of urban design. His writings offer a new view of his activities in architecture and urban planning, and provide the intellectual context for his own work as an architect, much of which is still controversial and often poorly understood. This book includes 16 essays dating from 1951 to 1977, ten of which are previously unpublished. The Writings of Josep Lluís Sert illuminates Sert's contributions to 20th-century architecture, urban design, and design pedagogy, and makes clear the similarities and differences between his ideas and those of his mentor, Le Corbusier. The essays reveal Sert's advocacy both for pedestrian urbanism and for planning in relation to the natural environment, ideas that have become important issues in contemporary urban design. Each text is introduced by the editor, Eric Mumford, a scholar of CIAM, Sert, and modern urbanism."--Publisher's website.

Lessons Encountered National Defense University 2015 This volume represents an early attempt at assessing the Long War, now in its 14th year. Forged in the fires of the 9/11 attacks, the war includes campaigns against al Qaeda, major conflicts in Iraq and Afghanistan, and operations in the Horn of Africa, the Republic of the Philippines, and globally, in the air and on the sea. The authors herein treat only the campaigns in Afghanistan and Iraq, the largest U.S. efforts. It is intended for future senior officers, their advisors, and other national security decisionmakers. By derivation, it is also a book for students in joint professional military education courses, which will qualify them to work in the field of strategy. While the book tends to focus on strategic decisions and developments of land wars among the people, it acknowledges that the status of the United States as a great power and the strength of its ground forces depend in large measure on the dominance of the U.S. Navy and U.S. Air Force in their respective domains.

Western Imperialism in the Middle East 1914-1958 D. K. Fieldhouse 2006-04-06 *The term 'Fertile Crescent' is commonly used as shorthand for the group of territories extending around the Rivers Tigris and Euphrates. Here it is assumed to consist of Syria, Lebanon, Jordan, Iraq and Palestine. Much has been written on the history of these countries which were taken from the Ottoman empire after 1918 and became Mandates under the League of Nations. For the most part the histories of these countries have been handled either individually or as part of the history of Britain or France. In the first instance the emphasis has normally been on the development of nationalism and local resistance to alien control in a particular territory, leading to the modern successor state. In the second most studies have concentrated separately on how either France or Britain handled the great problems they inherited, seldom comparing their strategies. The aim of this book is to see the region as a whole and from both the European and indigenous points of view. The central argument is that the mandate system failed in its stated purpose of establishing stable democratic states out of what had been provinces or parts of provinces within the Ottoman empire. Rather it generated basically unstable polities and, in the special case of Palestine, one totally unresolved, and possibly unsolvable, conflict. The result was to leave the Middle East as perhaps the most volatile part of the world in the later twentieth century and beyond. The main purpose of the book is to examine why this was so.*

Crossing the Rubicon Michael C. Ruppert 2004-09-15 The acclaimed investigative reporter and author of Confronting Collapse examines the global forces that led to 9/11 in this provocative exposé. The attacks of September 11, 2001 were

accomplished through an amazing orchestration of logistics and personnel. Crossing the Rubicon examines how such a conspiracy was possible through an interdisciplinary analysis of petroleum, geopolitics, narco-traffic, intelligence and militarism—without which 9/11 cannot be understood. In reality, 9/11 and the resulting "War on Terror" are parts of a massive authoritarian response to an emerging economic crisis of unprecedented scale. Peak Oil—the beginning of the end for our industrial civilization—is driving the elites of American power to implement unthinkably draconian measures of repression, warfare and population control. Crossing the Rubicon is more than a story of corruption and greed. It is a map of the perilous terrain through which we are all now making our way.
