Law & Advertising Dean K. Fueroghne 2017-03-01 In this lively, entertaining, and informative book, Dean K. Fueroghne guides readers through the complex laws governing the creation of advertising, illuminating a heavily regulated arena at the intersection of free enterprise and consumer protection. Is it acceptable to use images of real people, famous or not? Can Nike talk about Adidas in its promotional campaign? When can money be shown? What constitutes puffery, or deceptive truth, or bait-and-switch advertising? What are the specific rules pertaining to professional businesses, political advertising, or the marketing of alcohol or tobacco? What is the difference between copyright and trademark? Fueroghne answers these questions and more as he covers the complex laws relevant to advertising in all its guises. In addition to discussing specific cases, he explains the reasoning behind the court's decisions and how it affects the business of advertising. Students of strategic communication as well as advertising professionals—from agency account executives and copywriters to art directors and freelance designers—will learn to anticipate when proposed advertising may cause legal problems and how to avoid costly mistakes. Advertising lawyers will also appreciate the book as a handy reference that gathers in one place the many disparate laws affecting marketing and promotion in the United States today.

**Lying and Deception** Thomas L. Carson 2010-04-29 Thomas Carson offers the most comprehensive and up-to-date investigation of moral and conceptual questions about lying and deception. Part I addresses conceptual questions and offers definitions of lying, deception, and related concepts such as withholding information, "keeping someone in the dark," and "half truths." Part II deals with questions in ethical theory. Carson argues that standard debates about lying and deception between act-utilitarians and their critics are inconclusive because they rest on appeals to disputed moral intuitions. He defends a version of the golden rule and a theory of moral reasoning. His theory implies that there is a moral presumption against lying and deception that causes harm — a presumption at least as strong as that endorsed by act-utilitarianism. He uses this theory to justify his claims about the issues he addresses in Part III: deception and withholding information in sales, deception in advertising, bluffing in negotiations, the duties of professionals to inform clients, lying and deception by leaders as a pretext for fighting wars, and lying and deception about history (with special attention to the Holocaust), and cases of distorting the historical record by telling half-truths. The book concludes with a qualified defence of the view that honesty is a virtue.
