Changing configurations of gender and rural society. Social and economic equality. Social dynamics and institutional capacity. Power and governance. Cross-cutting these challenges are the growing interdependence of rural and urban; the rise in inequality within and between places; the impact of fiscal crisis on rural societies; neoliberalism, power and agency; and rural areas as potential sites of resistance. These are the central questions explored in *Health at Gunpoint*, a book that brings into clear focus the silent war being waged by the FDA against American consumers. The FDA was established in 1906 to protect the U.S. public from misbranded and adulterated foods and drugs. In *Health at Gunpoint*, award-winning health writer James Gormley presents a history of this Federal agency's long-standing battle against health products and examines some of its most controversial decisions and the troubling reasons behind them. Now, the FDA is once again poised to make decisions that would have a major impact on the public's health—this time, by imposing restrictions that would eventually eliminate many of the nutritional supplements Americans take every day. *Health at Gunpoint* not only sheds light on what is happening, but also prepares you for the coming battle.
