Vector Calculus

1 Vectors in Euclidean Space 1.1 Introduction In single-variable calculus, the functions that one encounters are functions of a variable (usually x or t) that varies over some subset of the real number line (which we denote by \mathbb{R}). For such a function, say, $y=f(x)$, the graph of the function f consists of the points $(x,y)=(x,f(x))$. These points lie in the Euclidean plane, which, in the ...
